

The Combat Rescue Sling (CRS) is a low cost, light weight solution that facilitates the rapid extrication of casualties. By reducing the battlefield weight during a drag, lift, or carry you create a mechanical advantage, in turn increasing the survivability on the battlefield.

- Used to drag or carry injured to safety.
- Rugged and reliable, all while being compact and portable.
- Rated at 4,500 pounds.
- A low cost high strength rescue option.
- Meets NFPA 1983 (06ED) and OSHA standards.
- Folds to fit in a available tactical bag, or a Rapid Deployment Pouch.

#### Rapid Deployment Pouch

- Rapid deployment pouch is MOLLE compatible for quick deployment of the CRS™ in high stress situations.
- With a firm pull on the D ring deploys the rescue sling.
- With a small footprint, approximately 6 1/2" x 8", this tool takes up very little space and weighs less than a pound.
- Available in all military color schemes.
